

THE INDIA CEMENTS LIMITED

PRESS RELEASE

INDIA CEMENTS DESPATCHES CROSS MILLION TONNES IN JULY

The India Cements Limited has crossed a major milestone in July 09 by despatching 1.02 million tonnes of cement and clinker. This is as against 0.86 million tonnes during the corresponding month last year, representing an increase of 19%.

India Cements could achieve this consequent to the commissioning of various expansion plans taken up by the company to increase its capacity in the first phase from 9 million tonnes to 14 million tonnes. With the stabilization of the expanded capacities and improvement in logistics, the company expects to improve the volume in the coming months.
